

Solensia™
(frunevetmab injection)

Thank You for Choosing Solensia

We're excited to start the process of getting your cat back to being "your" cat.
As you move through the treatment process, here's what you might expect with Solensia.

A once-monthly injection administered in your veterinarian's office

Works like your cat's naturally made antibodies to reduce pain signals¹

Controls osteoarthritis pain in cats: After a single treatment, cats showed increased mobility²

In between appointments, **don't forget to track your cat's progress** (by taking video of your cat or taking notes) and share back with us at the next appointment.

To make each visit as comfortable as possible for you and your cat, here are some **tips and tricks**.

Solensia should be given once a month, every month, to ensure the best possible results. Don't forget to schedule your monthly appointments to keep your cat on track with their treatment.

IMPORTANT SAFETY INFORMATION: For use in cats only. Women who are pregnant, trying to conceive or breastfeeding should take extreme care to avoid self-injection. Allergic reactions, including anaphylaxis, could potentially occur with self-injection. Solensia should not be used in breeding cats or in pregnant or lactating queens. Solensia should not be administered to cats with known allergy to frunevetmab. The most common adverse events reported in a clinical study were vomiting and injection site pain. See full [Prescribing Information](#).
